PET PRODUCT

A PROJECT REPORT

ACKNOWLEDGEMENT

We sincerely thank Hemant Yadav Sir, the internal project guide, for his invaluable time, advice, motivation, support, and collaboration during the course of our project. We greatly appreciate the IT Department for giving us the chance to work on

Whilst working on this project, we are improving our technological abilities. Hemant Yadav Sir provided direction for the completion of this project. This project made it easier to comprehend the numerous factors that go into developing a web application, as well as how the front end and back end work together to produce a completely functional web application.

We appreciate Parth Shah, the department head, and the entire department for their unwavering support.

ABSTRACT

The goal of the our website "PET PRODUCT" is online business and E-commercial website. Our website are main goal is attract a people for our website. Our goal is to connect more and more people are connect our website.

The people is use our website for purchase our product for pet or dog. Our website is sell a product for pet food , pet toy, pet belt , etc.

Our main goal is for connect people our website and visit our website.

Introduction:

our design is about precious product is available for our website.

in our Web point All Product Are Available whose Need For Pet.

All Product Is Available In Our Website.

Our Website is E-commercial Website.

This Is Business Purpose Website.

In This Time All People in This world To Join A Social Media And Phone.

numerous People Are Purchase A Product is Online.

Our Main Goal Is The people is Come For Our Website And Visit Our Website and understand why to create we this Website and use this Website by people.

Many Online Website Are Available in the E-commercial but Our Website Is Different because All Product For pet Is available in our Website.

The Lessons Learned:

- This is many free online marketing website for sell a product for pet.
- Success is not come for us we make a hard work for achieve our goal.
- Social media requires daily participation to succeed. If you do not actively participate in the online conversation, you will fail.

Scope of the Project :

in our website client is buying a product in the online shop.

People are add a product in wain for our website.

Problem in this project :

There are numerous problem produce when we make a design.

There are two pupil a making a design both are write a law in particular laptop.

So how to run a design in different laptop.

Module :

User module :

In our project we make a user module then customer or say people are login for our website and sign up for our website.

Problem definition :

 A platform for users to purchase different pets product and to adopt street dogs.

Software Requirement Specification :

First of we install visual studio code in our laptop.

We install all extension for visual plant law.

We produce a new brochure in our drive and save a all programs and lines in our drive.

We run a law in visual plant law in live garçon.

We write a program in visual plant law and run this program.

in our website we use a html language, javascript language, and css language.

we produce a front- end in our website.

OPERATING SYSTEM : Windows 7/ XP/8

FRONT END : HTML, CSS, JavaScript query

SOFTWARE USED :

 1) HTML: Hypertext Markup Language

 2) CASCADING STYLE SHEETS (CSS)

 3) JAVASCRIPT

Future planning in our project :

we not produce a back- end in our design.

Also not produce data base in our website.

 In this design we produce only faced in this pet design.

 So, in future we make a back- end in this pet product website.

this is our main web runner of our website.

 different option are is then in frontal runner.

this is different types of products whose requirements for pet are available in this runner.

people are see a details of product in this runner.

 people are choose a product in this runner.

this is our login page or say sign-in page of our website. people are login in website for e-mail id and password is login this page. user can forget a password in this page. and resat a password from his e-mail id.

in this page product is available whose purchase a people. this product is available in this page.

Conclusion:

In conclusion, websites offer various pet products to cater to the needs of pet owners. From food and treats to toys and bedding, there is a wide range of products available to suit different types of pets. Grooming and health products are also available to ensure pets maintain good hygiene and live healthy lives. As

a pet owner, it's essential to choose products that suit your pet's specific needs to ensure they are happy and healthy.
